Objective:

Dedicated Full Stack Developer with expertise in Angular, TypeScript, JavaScript, and backend technologies, seeking a challenging role to leverage strong front-end and back-end development skills. Passionate about building scalable, efficient web applications and contributing to dynamic development teams to deliver high-quality software solutions.

Professional Summary:

Results-driven Angular Developer with **2.8 years** of experience specializing in designing and developing modern, responsive, and scalable web applications. Proficient in Angular 11, Node.js, Express.js, and Firebase, with strong expertise in HTML5, CSS3, TypeScript, and Bootstrap 5.3.3. Skilled in building RESTful APIs, integrating third-party services, and implementing Google Maps API for location-based functionalities.

Experienced in creating dynamic user interfaces and interactive dashboards using Reactive Forms for efficient data handling and validation. Adept at managing full-stack development tasks including user authentication, secure data transactions, and real-time database management with Firebase. Strong command of Git for version control and Agile methodologies for collaborative project delivery.

Excellent communicator with a proven ability to work effectively in agile teams to deliver high-quality software solutions on time.

Technical Skills:

- **Programming Languages:** Java, JavaScript, TypeScript, Node.js
- **Frontend:** Angular (v11, 15, 17), AngularJS, HTML5, CSS3, Bootstrap 5.3.3
- **Backend:** Node.js, Express.js
- **State Management:** NgRx, RxJS
- **Databases:** SQL, Firebase
- **APIs:** RESTful APIs, Web APIs
- **Version Control:** Git
- **Data Formats:** JSON, XML

Work Experience:

Angular Developer
Staffing Services India pvt. ltd.
Oct 2023 – May 2025

- Designed, developed, and maintained web applications using Angular 11, Node.js, and Firebase, SQL and MongoDB delivering scalable and responsive applications.
- Built complex, modular, and reusable Angular components to create dynamic and interactive web interfaces, ensuring a responsive experience across multiple devices.
- Implemented HTTP requests and integrated RESTful APIs for seamless data retrieval, displaying and updating data in real-time within the application.

- Developed and managed Reactive Forms for efficient user input handling, validation, and dynamic field generation.
- Implemented secure user authentication and access control using Firebase Authentication.
- Utilized RxJS Observables to manage asynchronous data streams and enhance real-time communication.
- Integrated Angular Material components to improve UI consistency and user experience.
- Collaborated with backend teams to ensure seamless integration between frontend and backend systems.
- Debugged, tested, and optimized web applications for better performance and cross-browser compatibility.

Front End Developer
SGMS Infotech LLP
Aug 2022 – Aug 2023

- Designed and implemented front-end components using HTML, CSS, JavaScript, and AngularJS, focusing on building responsive and user-friendly web pages.
- Developed interactive and dynamic web pages using Bootstrap for responsive design, ensuring compatibility across different devices and screen sizes.
- Worked on creating and managing AngularJS forms, implementing one-way and two-way data binding for efficient data synchronization between the view and the model.
- Fetched and displayed data from external APIs and services, enabling dynamic updates to the frontend and ensuring real-time content delivery.
- Focused on building clean, efficient code to optimize page load times and performance, contributing to improved user experience.

Projects:

Project: Rent N Sale
Role: Full Stack Developer.
Technologies Used: Angular 11, Node.js, Firebase, Express.js

- Developed **Rent N Sale**, an online platform for renting and selling products, aimed at connecting vendors (sellers) with customers (buyers), facilitating product transactions for real estate, vehicles, furniture , Home Appliances and other categories.
- Created an interactive and responsive dashboard with various filters to enhance user experience and ease of navigation across multiple product categories.
- Implemented Reactive Forms for vendors to post ads, ensuring proper validation of user input and secure submission of data. This data was stored in Firebase and displayed on Product Summary and Product Details pages.
- Designed and developed both **Rent N Sale Admin Panel** with Admin Dashboard and Vendor Dashboard to manage product listings and user data separately. Integrated role-based access control to allow admins and vendors to perform respective operations efficiently.
- Integrated Google Maps API with location-based filters, allowing users to view products based on their current location or filter by different cities. Enabled location services for enhanced user interaction.
- Added image upload validation to restrict file size and image dimensions, ensuring proper quality and format for product listings.
- Created a search functionality for users to filter products based on cities and other criteria, improving accessibility and relevance of product listings.

Project: Business For Sale

Role: Angular Developer.

Technologies Used: Angular 11, Node.js, Firebase, Express.js

- Developed **Business For Sale**, an online marketplace connecting buyers and sellers to facilitate business transactions across various industries.
- Created an intuitive user interface for easy navigation and enhanced user experience while accessing listings and services.
- Implemented features for adding and managing products and services, ensuring proper validation and seamless submissions.
- Designed dashboards for buyers and franchise brokers to view listings, filter searches, and manage profiles efficiently.
- Integrated a buyer handbook and seller handbook to guide users through buying and selling processes.

- Enabled detailed search capabilities for buyers to filter businesses by industry, location, and price range, improving listing accessibility.
- Implemented secure OTP verification during user registration to enhance security.
- Managed data with Firebase for reliable storage and communication between frontend and backend services.

Project: Human Search

Role: Angular Developer.

Technologies Used: Angular 11, Node.js, Firebase, Express.js

- Developed **Human Search**, an online hiring platform designed to connect job seekers (candidates) with employers (recruiters), streamlining the recruitment process across various industries.
- Created a user-friendly interface with intuitive navigation for both candidates and recruiters, enhancing user engagement and experience throughout the job search and application process.
- Implemented an advanced search feature that allows candidates to filter job listings based on specific criteria, improving the relevance of search results.
- Developed the **Human Search Admin Panel**, empowering administrators to manage users, monitor job postings, and oversee application processes effectively.
- Integrated a feedback system allowing candidates to provide reviews on job applications and recruiter interactions, fostering transparency in the hiring process.
- Added bulk mailing capabilities and blog management features to keep users informed about updates, industry news, and job-related content.
- Implemented secure login and registration pages with OTP authentication, enhancing security during user registration and access.

Certifications:

- Angular Intermediate, JavaScript Basics, Python Basics — HackerRank
- Advanced C++, C, RDBMS — IIT Bombay (Spoken Tutorial)
- Career Edge: Knockdown the Lockdown — TCS iON
- Core Java, JavaScript — Learn Vern
- HTML & CSS Fundamentals — SoloLearn

Education:

- **Master of Computer Applications (MCA)**
  Dr. D.Y. Patil Institute of MCA and Management, Pune
  Oct 2021 | 66.21%

- **Bachelor of Computer Applications (BCA)**
  Rayat Shikshan Sanstha's Mahatma Phule College, Pune
  May 2018 | 50.70%

- **Higher Secondary Certificate (HSC)**
  Nav Maharashtra Jr. College, Pune
  Apr 2014 | 73.23%

- **Secondary School Certificate (SSC)**
  Rajeev Gandhi Madhyamik Vidyalaya, Pune
  May 2012 | 68.80%

Online Profiles:

- **LinkedIn:** https://www.linkedin.com/in/satish-jadhav-4105691a1/

- **GitHub:** https://github.com/satishjadhav1404

Field of Interest:

- Full Stack Web Development
- Frontend Development with Angular
- RESTful API Development and Integration
- Responsive and Mobile-first Web Design
- Cloud Technologies and Firebase
- Database Management (SQL, NoSQL)
- UI/UX Design and Optimization
- Agile Software Development

Personal Details:

- **Full Name**   :   Satish Raju Jadhav
- **Date of Birth**   :   11-02-1996
- **Gender**   :   Male
- **Marital Status** :   Single
- **Nationality**   :   Indian
- **Languages**   :   English, Marathi, Hindi
- **Hobbies**   :   Exploring travel destinations, watching movies, listening to music, dancing, cooking
- **Contact No.**   :   +91-7972383784
- **Address**   :   2nd Floor, Bhaktirang Building,Kinara Colony,Nakhate Vasti
                          Opp.Nakhate Petrolium,Rahatani,Pimpri,
                          Pune,Maharashtra-411017

Place: Pune

Date: (Satish R. Jadhav)
